Medical english textbook pdf

Academia.edu cookies to personalize content, tailor ads and improve user experience. By using our site, you agree to collect our information through the use of cookies. For more information, see our privacy × Students Free Trial TEACHERSFree Demo Our focus here is English and English medicine for healthcare as it is spoken and written around the world in hospitals, doctor's offices, and EMT (emergency medical technician) operations. Our custom app features a wide range of American English and British English learning activities including: reading, writing, speaking, multiple choices, spelling, and listening understanding. We like to think of ourselves as an interactive online textbook with a built-in certification program that can be used in either 100% online or mixed learning classrooms. The course is delivered through a standard web browser and works great on any desktop, laptop, tablet, or mobile phone with an internet connection. The subject and activities included are written and designed by TEFL experts (teaching English as a foreign language). The pre-intermediate to advanced difficulty of the English level is scaled according to the CEFR (European Language Level Council). It is technically classified as a ESP course (English for specific purposes), teaching well over 1,000 medical workplace vocabulary conditions. Many ESP teachers (English for specific purposes) don't even know the subject they teach. It's okay, it's okay! Our content is written and narrated by professionals, many of whom have EFL certificates (English as a foreign language) of teachers. Easily view and manage students, spend time online, completed activities, and tour grades... Students can match their grades against a database of users around the world viewing more... There are no banner ads, third party trackers, or other forms of advertising on this site to distract from the educational experience.
